## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art known by the Examiner is listed on the PTO 892 form of record. As argued by Applicants' the cited prior art does not anticipate or make obvious, *inter alia*, wherein the oxygen is introduced into the chamber at a flowrate less than or equal to the flowrate of the cyclic organosiloxane as required by the present Claims. The Examiner et al notes that Foo et al starts the oxygen flow first, turns off the TMCTS while the oxygen flow is continuing and discloses that the oxygen flowrate should be three times the TMCTS flowrate. Accordingly, there is no motivation, absent impermissible hindsight, to introduce oxygen at a flowrate less than the cyclic organosiloxane as required by the present Claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
